James,

We've reviewed the signage package. We don't have any regulatory authority on the signs internal to the site, except for signs visible to the state highway that are not for 'on premise advertising' – in other words a billboard. I didn't see any billboards included on the plans, so I'll assume none are planned currently. We did review the signs at the entrance to determine if they would have any impact to the flow of the site to and from NYS414 and we have no comments. Signs on NYS414 will be reviewed in the highway work permit process when we review the highway plans.

Any questions, please feel free to contact me.

Thanks
Betsy

Subject: Lago Casino Signage

Hi Betsy,

As we just discussed on the phone, I've attached the applicable signage section of the Planned Unit Development (PUD) Code that is in use for the Lago Casino Project. Based upon how this is written "*(regarding any traffic safety hazard impacts)*", we feel the only two applicable signs are for the bicycle and horse/buggy signs that are being proposed along NYS RT414. My apologies as I didn't realize the signage package was revised last week and these signs are now shown within the NYSDOT's right-of-way. These two sign locations within the right-of-way are just placeholders showing intent. Final locations of these signs and any others required along NYS RT 414 would be determined and reviewed with the upcoming NYS RT 414 widening / entrance permit plans that will be provided to your office for review and comment.

You can use the following link to access the exterior signage package for the project;

<https://file.ac/jH9pltuO6iU/>

If you have any questions or need any additional information at this time please let me know and I would be happy to help.

Thanks,

James G Cretekos, P.E.
