Dear Mike:

The Village of Waterloo treatment plant has a capacity of up to 4 million gallons per day (MGD) and currently averages 1.2-1.3 MGD. As the purveyor of water to the proposed Casino project in the Town of Tyre we understand the daily demand may be approximately 200,000 gallons per day and the Village is currently in a position to supply this estimated water demand.

Sincerely,

Donald Northrup
Village Administrator
